| Class: TY.IT                   | Batch: 1                            |
| Date of Assignment: 09/09/2026 | Date/Time of Submission: 09/09/2026 |

### 3A Create and configure Issue Types (Epic, Story, Task, Bug)

Open the FSP board of the Full Stack Project.

The Kanban board contains different columns representing different stages of work:

Backlog - Selected for Development - In Progress – Done

The Kanban board gives a visual representation of the work being performed in the project.

In the Backlog column, click Create. A new issue card will appear with the field:

What needs to be done?

Enter the name of the work item.

For example: Team Interaction

Different types of work are represented differently in Jira.

For example:

- Task - A specific piece of work
- Bug - A problem or defect
- Epic - A large body of work

For a normal activity, select Task as the issue type.

Enter a suitable task name.

Example:

Team Interaction

Click the Create/Enter button to create the issue.

The task will appear as a card in the Backlog column.

Create another issue and select Bug as the issue type.

For example:

## Omkar Prakash Sawant T040

Fix Homepage: The bug will be represented with the Bug issue type/icon.

### 3B Create Components and Versions.

Click on space settings

# Omkar Prakash Sawant T040

Click create Release and Enter details. Enter details and click save. Version list will Appear
